Cooley Bros' "Service Garage"

The Last Word in the Building of an Up-to-date Garage-- A Credit to Chinook and District

Even before the advent of the new "Service Garage" the new "Service Garage" there may be than the laymen. Chinook was noted for its large buildings.

Perhaps the Chinook Consolidated School building has established a precedent, but the more likely supposition is "Garage." The building encloses an area of 7,500 sq. feet. Sceptics agree that, "It's away too big," but time has perhaps had a clearer con-

best what was required to handle their business. The building is of thoroughly fire-proof construction and is modern in every respect, from the front of the spacious, well-lighted office to the rear of the equally well-lighted, well-equipped shop and storage.

The office takes up about 2000 square feet or, approximately one-quarter of the floor space. This is divided into a stock room with a complete Berly system of parts bins, capable of handling with ease a \$25,000 stock of Ford "A" and "T" parts, a large office ladies' waiting room, with wash room, etc., and a main office equipped to handle the general wants of customers, with an eye to Snappy Service by the use of handy accessory shelving, etc.

Practically the whole of the front of the building consists of plate glass, 250 feet in all, fitted with 50 ft. of display counter.

That the office is large need not be mentioned when one learns that in addition to the equipment named above there is still ample floor space for new car and radio display.

The shop is perhaps one of the most completely equipped of any in Alberta, comprising an 8 ft. 22-in. swing South Bend Gap Lathe, K. K. Wilson repair machine, oxy acetylene welding outfit, thirty ton press, large vulcanizing outfit, capable of handling practically any tire repairs, and also many other smaller machines such as valve relacing tool, miniature lathe, compression testing machine, also Consto-Potential battery recharging equipment.

The equipment and work stalls cover an area of approximately 1700 square feet, leaving the remaining 3000 sq. feet, with the exception of a wash rack, for storage purposes.

The basement is large also, 35x45 feet, and contains the steam heating plant, automatic water supply layout and an compressing outfit. Cold water is supplied from a well in the basement and is suitable for drinking purposes. The hot water and car washing supply comes from a 200 barrel cistern located beneath the floor of the stock room.

The appearance of the front of the building is greatly enhanced by the addition of a service station hood over the gas pumps. The extension is supported at the outer end by four concrete pillars, and is lighted by a skylight in the day time and a row of electric lights at night. It contains all modern equipment, clean vision pumps, oils on tap and free air.

The new "Service Garage" with electric light, running and steam heat, to say nothing of appearance, is indeed a building of which, not only the owners but Chinook in general, may well be proud.

School Examination Results

The following is the report of the Christmas examinations of Chinook Consolidated School District:

GRADE I.—SR.	Per Cent
Eileen Proudfoot	97
Arthur Pfeifer	93
GRADE I.—JR.	
Freda Hormann, 2 Maxine Hurley, and Rodney Brudine, 3 Billie McLean, 4 Edith Dawson, 5 Peter Neufeld, 6 Harold Rosenau, 7 Lester Barton, 8 Peter Johnston.	

GRADE II.	
Mary Schmidt	97
Siegfried Peters	97
Agnes Martens	94
Rudolph Pfeifer	93
Joyce Milligan	91
Alice Gilbertson	91
Everett Vennard	91
Jack Lee	90
John Schmidt	90
Marcel Massey	85
Audrey Rideout	86
William Hoemann	86
Isobel Vanhook	84
George Schmidt	79
John Sandman	77

Aron Voth	67.4
Hellena Rosenau	62.7
Earl Robinson	61.7
Billie McIntosh	59.1
Evelyn Vennard	56.3
Walter Rosenau	51.8
Norma Marr	50.1
Harold Dressel	50.0
Corinne Strong, not ranked	

(Results for Grades 5 to 11 will be published next week.)

DELEGATES TO U. F. A. CONVENTION RETURN

Neil McLean, delegate to the U. F. A. Convention at Edmonton, from Chinook Local and S. W. Warren from the Cloverleaf Local, returned on Sunday morning. They report a very interesting convention, much interest being shown by delegates in the discussion in respect to the proposed change in the School Act as outlined by the Minister of Education, change in personnel of the board of Grain Commissioners, increased tax on gasoline, etc. In the opinion of the delegates the convention was a great success and should result in increased interest being shown in the U. F. A. work.

Western Canada in the Spotlight

The attention of people in all parts of Canada, and, in fact, of the world, will be directed to the prairie provinces of the Dominion during the next few months in a way and to an extent probably unprecedented in the history of any country, by reason of the applications to the Dominion Parliament for charters to build many hundreds of miles of railway in the northern portions of Manitoba, Saskatchewan and Alberta.

Both the Canadian Pacific and the Canadian National Railways are asking Parliament for power to enormously extend their lines into the north country, and both announce their eagerness to proceed with the work of construction with the least possible delay. There is the keenest kind of rivalry between these two great systems for rights into certain sections of this territory, with the result that a battle royal will take place at Ottawa when Parliament assembles.

One thing emerges quite clearly from the situation that has developed with almost startling suddenness, and that is, that, despite all former statements and predictions to the contrary, the railway managements of Canada are now convinced of the enormous wealth of natural resources in the more northerly portions of Canada and of the success of the Hudson Bay Railway and Hudson Bay route to the markets of the old world.

There had long been a suspicion in the minds of many Western people that the former opposition in Montreal and other Eastern centres to the construction of the Hudson Bay Railway was based, not on their professed scepticism as to the feasibility of the route, but because of their belief that the route would prove to be an unqualified success, with all the upheaval which the opening of this short route from the heart of the prairies to the markets of the world would cause in existing transportation conditions, rates, and routing of traffic.

Examination of the plans of the railways, as thus far outlined, indicate a reversal of formerly held views that the people of Western Canada should be served by lines running east and west, with all the tremendous production of the prairies moving out either to the Atlantic or the Pacific seaboard, and all our imported products coming in through the same ports. Now, both of the great railway companies appear to be determined to connect up their east and west lines by short branches here and there and the construction of great north and south main lines, all stretching hundreds of miles north of existing settlement and heading towards tidewater in the north. A veritable railway revolution is in prospect.

This declaration of absolute confidence in the northern half of these prairie provinces, and in the Hudson Bay outlet, evidenced by the willing-ness of the biggest financial men in Canada interested in the C.P.R. to expend tens of millions of dollars in northern extensions, will attract the attention of the whole world and will constitute the greatest publicity this section of the Dominion has ever received.

Regardless of the decisions reached by Parliament as to division of the northern territory between the rival systems, and the respective zones to be allotted to each, the result will be to roll back the map of Canada hundreds of miles. The old republic and westward of Canada that it consisted of a narrow strip of more or less settled territory extending thousands of miles from the Atlantic to the Pacific along the Canada-United States boundary line, is to be removed. To the Dominion will be given great depth as well as great width, and what for centuries has been looked upon as barren wastes of extensive territory, but of no value, will become a storehouse of treasure, the development of which will add enormously to the population and wealth of the Dominion, providing new avenues of employment, and diversified employment at that, for the people of Canada.

Utilizing Coal Resources

The new Fuel Research Laboratories of the Department of Mines at Ottawa, were designed and the equipment selected with a view to carrying out investigations which would be in the interest of the development of the coal resources of the Dominion.

Fresh Supplies In Demand.—Wherever Dr. Thomas' Electric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

Canadian Cheese

The production of factory cheese in Canada in 1926 amounted to 171,781,031 pounds. The value was \$61,755,350.

Simple Precautions Against FLU

Sore Throat —

— The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—and the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate relief will be Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease—breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

Alberta's Peer's Estate

Estate Of Earl Of Egmont Estimated To Approximate One Million Dollars In Value

That the estate to which the Earl of Egmont, of Priddis, Alta., has fallen heir, will approximate one million dollars is an estimate made at Calgary with his assistance.

The bulk of the estate comprises Avon Castle, the family seat at Ringwood, Hants, and 1,300 acres surrounding it.

Some \$40,000 has been spent lately in improving the land and the residence, declared the new earl.

In addition, he says, there are investments in stocks and shares and in war bonds amounting to a large total.

A STOMACH RESTORER

Good Advice From One Who Had Suffered Much

Discomfort after eating, gas pains in the intestinal tract, pains around the heart, sour risings in the throat called heartburn, are common symptoms of dyspepsia. It is a condition often neglected until it has done permanent harm, yet the treatment is simple. The great contributing cause to this trouble is thin blood. Good blood and plenty of it is required by the stomach to function properly. If the blood is thin, the stomach becomes sluggish, food lies undigested, gas forms causing pains, often around the heart. Instead of getting nourishment from the blood the system gets poison. The proper treatment is to enrich the blood, and there is no other medicine can do this as promptly or as effectively as Dr. Williams' Pink Pills. The sole mission of these pills is to make new, rich, red blood, which reaches every organ and nerve in the body, and thus not only banishes indigestion and dyspepsia, but also all other troubles having their origin in weak, watery blood.

The splendid results following the use of Dr. Williams' Pink Pills is shown by the case of Mrs. Lucy A. Cushing, a former resident of Kemp, N.S., but now living with her son at West Bethel, Me. Mrs. Cushing says:—"I have no hesitation in strongly recommending Dr. Williams' Pink Pills. For years I was a great sufferer from indigestion. Always after eating I suffered from pains in my stomach and other distressing symptoms that accompany this ailment. I tried different doctors while residing at my old home and also at West Bethel, but without getting relief. I was advised by a friend to try Dr. Williams' Pink Pills. I did so and I must say that I am feeling very grateful ever since to the good friend who gave me the advice. I soon found the pills helping me and by the time I had taken nine or ten boxes I was completely restored to good health. Though I am now in my 70th year I am feeling as well and smart as I did at 25, and am enjoying life once more." You can get these pills from any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Speakers At Dinner Of Canadian Society

U.S. and Canadian Senators Guests At Function In New York

The Canadian Society of New York helped to strengthen the North American entente cordiale by bringing together as their guests at their annual dinner two senators, one from the Canadian Upper Chamber, Hon. C. P. Beauregard, K.C., and the other from the United States House, Hon. Simon D. Pess, of Ohio. The speakers dealt with the aspirations of the two countries.

Senator Pess frankly discussed the two chief issues now agitating the Congress, the Kellogg treaty and the new cruiser program, and he readily supported both. The United States, he declared, should not put any obstacle in the way of the effort to banish war.

Senator Beauregard reviewed the development of Canada in recent years and painted a glowing picture of the Dominion's future.

"Canada, with a vision quickening and widening, has remained sober-minded, fairly traditional, and, I think I can add, hardworking and still law-abiding and God-fearing," he said.

"When you grow up you shall be a gentleman."
 "I don't want to be a gentleman. I want to be like you, daddy."
 —Jugent, Munich.

Shows Canada's Loyalty

London Paper Expresses Appreciation Of Reverse To Penny Postage

The London Sunday Times in an editorial headed "Canada leads the way," welcomed the increased British immigrant quota as emphasizing the practical loyalty of Canadians to their British stock, but fears that the proper advantage may not be taken of it in Great Britain. The newspaper quotes further encouragement both of propaganda and finance. The Sunday Times also expresses appreciation of the penny postage and finds in it "a signal proof of Canada's strong imperial sentiments."

After urging Hon. Winston Churchill, chancellor of the exchequer, to follow Canada's example the Sunday Times advocates a common empire stamp which, it states, would have a real psychological value as a symbol of imperial unity.

LAXATIVE FOR BABY THAT "STAYS DOWN"

Baby's tiny system rebels against castor oil and strong purgatives; but here's a medicine that just suits him. And it does the work quickly and so gently that Baby doesn't feel it. Fletcher's Castoria is soothing, cross, fretful babies and children to sleep and making the feverish, constipated, upset ones well and happy, in millions of homes today. Castoria is purely vegetable, harmless and endorsed by the medical profession. Avoid imitations. The Chas. H. Fletcher signature marks genuine Castoria.

Kellogg Explains Treaty
 The Paris pact for renunciation of war commits none of the signatories to it to go to war in defence of any country attacked in defiance of the treaty, Secretary of State, Frank B. Kellogg, informed the Senate committee on foreign relations during the recent hearings. He added that Canada made it plain that the dominion would not be a party to the treaty unless that was understood.

An acquaintance says the most undesirable place in the world to live is beyond one's income.

New Metallurgical Discovery

New Process Said To Make Cardboard As Strong As Iron

What is called "the most important metallurgical process since the discovery of steel" is announced in an advertisement by the Einstein Electro-Chemical Process, Ltd., published in the London newspapers.

Materials which are non-conductors of electricity can now be electroplated, according to the claim made by this company, which asserts that wood, silk, porcelain paper and all metals can henceforth be coated with a surface of non-corrosive metal. As a result of the treatment even such flimsy materials as cardboard or plywood can be given the strength of iron and made resistant to the corrosive action of steam, heat, chemical fumes and water, it is declared.

Fortification of the frail fabric of airplanes and airships to the strength of steel, and solution of the boat-builder's problem by entirely metalizing craft of every description, are among the claims made for the new invention. Woodwork and textiles can be similarly metallized, it is asserted.

The advertisement asserts that the British Admiralty and Air Service have ordered articles on which the electro-chemical process has been successfully used.

Needed Some Practice

Aunt: "Johnnie, why is it that you never remember to say 'Thank you'?"
 Johnnie (eying wistfully a box of choicest of his aunt's knee): "I expect it's 'cause I don't get enough things given to me to practice."

Awful Asthma Attacks. Is there a member of your family who is in the power of this distressing trouble? No service you can render him will equal the bringing to his attention of Dr. J. D. Kellogg's Asthma Remedy. This remarkable remedy rests its reputation upon what it has done for others. It has a truly wonderful record, covering years and years of success in almost every part of this continent, and even beyond the seas.

A python 25 feet long, a giraffe 20 feet tall, an elephant weighing four tons and an insect measuring 12 inches are among the "records" of the London zoo.

Minard's Liniment prevents Flu.

The palatial stables of the former German Kaiser have been converted into Berlin's first indoor tennis court.

For Colds

How many people you know who end their colds with Aspirin! And how often you've heard of its prompt relief of sore throat or tonsillitis. No wonder millions take it for colds, neuralgia, rheumatism; and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have often told you Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

Aspirin is a Trademark Registered in Canada

ASPIRIN

Good and Poor Crops Cost About the Same, But Profits Come From Use of Good Seed

Outside of a little extra expense in harvesting, the cost of producing a good crop and a poor one is about the same, but the profits to the grower of the two vary greatly. Usually an average crop barely pays the cost of growing, and a poor one registers a loss. On account of the overhead, which remains fairly constant, despite the yield, it is of prime importance to the producer to get the very highest returns possible from his land. In this connection the seed used is one of the most important factors. Farmers have no control over sunshine, moisture or storms. They have little protection against early or late frosts, but they have very definite control over seed. It is to get producers to exercise this control that the Provincial and Federal governments are co-operating in putting on better seed campaigns. "Clean, sound, plump, well graded seed will produce from 10 to 100 per cent. more crop than weed-infested, ungraded seed," states Hon. John S. Martin, Ontario's Minister of Agriculture, who points out that increased crop yields lower the cost of production and that the lowering of this cost is the best way to increase farm products. He advises the purchasing of the seed supply from reliable seed houses or careful growers, from which, incidentally, the seed houses purchase their supplies, which are cleaned up by them and government graded before being offered for sale.

Not only does dirty seed produce a smaller crop for every seed sown, because the poor grain will not yield as high an average as plump, clean graded seed, but there is a direct loss from the growth of the weeds in this supply. Weeds occupy a considerable portion of the land that should be occupied by the grain, and, in addition to this, going to seed usually before the regular crop is ready to harvest, they pollute the land for another year.

The cost of the seed is a minor factor. According to the Dominion Bureau of Statistics, the average yield of oats in Canada for the last ten years runs slightly under 31 bushels per acre, which at current prices are worth about \$18. The extra cost of good, clean, graded seed over the commercial variety to seed one acre of oats would not amount to more than a dollar, but where this good graded seed is used, the return should run, according to Government figures, at the very least 40 bushels to the acre. In other words, for an expenditure of only one dollar the returns in dollars and cents would be increased by over \$5 per acre.

Subject To Revision

Overheard in the fur trade—two salesmen speaking:
"Vat was your holiday business, Maunna?"
"Hundert und ten thousand dollars, Sidney."
"Vot!"
"As true as I'm alive. How much you get?"
"Hundert und thoidy thousand."
"Vy you lie to me?"
"Vell, you come down a teetle, I come down a teetle."

Immigrants Arrive

The first party of immigrants from Canada under the provisions of the £10 fare scheme worked out by the British and Canadian governments, arrived recently in Halifax on the Cunarder Antonia, and the White Star liner "Laurencia." They are trained soon after arrival for placement on Canadian farms.

A young man can spare the arm that it takes to hug a girl while driving, but he can't spare the mind that it takes to operate the arm!

The Purser's Reward

Received Two Half-Crowns From Millionaire For Special Attention

This story is told of a remarkable case of self-control in one of the largest liners on the Atlantic service. The owners of the ship had given instructions that a certain millionaire who was a passenger should receive special attention, and that everything should be done to make his trip thoroughly enjoyable. The purser saw to it that these instructions were carried out to the letter and the favored passenger was treated like a royal personage. So far so good.

At the end of the voyage the purser received a visit from him. "I just wanted to tell you that I'm very grateful for all you have done for me," he said. "This has been the most delightful trip I have ever made, and I feel I'd like to make you a little present." With these words the millionaire pushed through the grill of the purser's office two half-crowns.

Without the flicker of an eyelid the purser picked up the coins. "Thank you very much, sir," he said. "It is most kind of you." Then passing the money over his shoulder to a very subordinate member of his staff, he added, "But I think this present should be given to Mr. So-and-So, here, sir. You see, he's a married man."

Medicine Hat Greenhouse

Expansion Plan Is Necessary To Meet Volume Of Trade

Although the Medicine Hat Greenhouse, Limited, has 170,000 chrysanthemums, 26,000 roses, and 84,000 carnations in bloom during December, the directors, at the quarterly meeting held the other day, unanimously agreed that expansion was necessary and authorized Fred Ward, the manager, to proceed with a \$20,000 addition, which will embrace five greenhouses, augmenting the eight and a half acres already under glass.

Darling Rompers

Something new in rompers for wee fashionables of 2, 4 and 6 years. It has raglan sleeves gathered into narrow bands. The rompers are straight at front, with tiny gathers at neck, which is finished with a hand collar. They close at back with a drop seat, with left leg left free, and finished with button and buttonholes, which gives it an unusually smart effect. Patch pocket at right side for "handy." They are adorable in pale blue satin finish cotton broadcloth with white linen collar band, cuffs and pocket with blue bone buttons. Candy stripes percale with plain plique in predominating tone, kindergarten prints in nursery rhymes, Nile green chambray with white plique, tan cotton rep with brown rep, French blue wool jersey with tan jersey, and printed plique with tan jersey, are practical suggestions for Style No. 344. Pattern price 25 cents in stamps or coin (coin is preferred).

Slaves To Ambition

Men Not Wholly Successful Who Cannot Enjoy Leisure

How much of your time and vitality should you give to business? This eternal question is raised afresh by the death of George H. Jones, chairman of Standard Oil of New Jersey, at 56, a victim of overwork. A poor boy, he early determined to prove helpful to his family. He became devoted to his job, made progress, found more and more to do, did it with zest and enthusiasm, took no time off for play. By the time he had won financial independence he had lost all taste for recreation. He was a chronic addict to work, more work and still more work. He was rewarded by election to the chairmanship of the greatest Standard Oil company of them all. Devoted associates and friends strove to induce him to relax. But his love for work had become incurable. And now he is dead, 20 years before his time.

Other men, not a few, are leading similar lives, shutting out all but their daily round of onerous duties. Ambition enslaves them. They find satisfaction only in achievement. But each achievement proves merely a stepping stone to a fresh achievement. Only sickness, then death, can stay them.

Theodore Roosevelt declared he would rather wear out than rust out. But does the pace that kills pay in the end? In my humble judgement, that man is not wholly successful who cannot so organize his activities as to permit of a rational amount of leisure, relaxation and enjoyment of social pleasures.

Fertilizing Strawberries

Subject Studied By Treating Plants With Different Fertilizers On Different Dates

Unless crop growers who use commercial fertilizers make a study of the effects of applications to crop much valuable material may be lost. A study of the subject by the horticulturists of the Department of Agriculture, at Ottawa, leads to the conclusion that the season of application is a highly important factor where there is a deficiency of any particular plant food. The usefulness of spring applications of nitrogen, it was found, is largely dependent upon the growth conditions of the plant in the previous fall. In a study of the subject the strawberry was used and treated with different fertilizers at different dates. The work was done by M. B. Davis and H. Hill, of the Horticultural Division of the Experimental Farms, and is described in a new pamphlet numbered 96, of the Department of Agriculture, which shows in colored plates the appearance of the foliage of plants grown separately under conditions of deficiency in nitrogen, potash and phosphorus. It was clearly brought out that plants have been starved during the fruit bud formation period for either element, very early spring correction of the starvation results in increased flower production and consequent yield of fruit.

Winter Flying In Canada

The handicaps of winter flying in Canada have now been largely overcome. Year-round operations are increasing, greatly to the benefit of the operating companies which can now keep their aircraft in constant work. Parson: "do you know where little boys go to when they smoke?" Boy: "Yes, up the alley."

Parson: "do you know where little boys go to when they smoke?" Boy: "Yes, up the alley."

ASSISTS INDUSTRY

A. T. ROBLIN.

To help locate and assist in the development of new industries in the Province of Saskatchewan will be the work of A. T. Roblin, who has just been appointed Canadian National Railway's industrial agent, with headquarters at Saskatoon. Mr. Roblin was born at London, Ont., 32 years ago, and has been with the National system for 15 years. The establishment of the new office in Saskatoon is in keeping with the rapid development of Saskatchewan and the policy of the Canadian National Railways in keeping abreast of the progress of the Dominion.

Arranging For Speed Tests

British Auto Racer Expects To Travel 240 Miles An Hour

Preparations are under way by the content committee of the American Automobile Association to arrange for Major H. O. D. Segrave, British racing driver, to conduct speed tests at Daytona Beach, Fla., where he expects to travel 240 miles an hour.

Segrave's machine, the "Golden Arrow," is constructed on radical ideas of streamlining, the association announced, and is expected to gain speed through design rather than brute strength.

The machine is powered by a 13-cylinder Napier airplane engine with the hood fitted over the engine like a glove. The length of the car over all is 25 feet, and its width six feet. It weighs two and one-half tons.

In first gear the machine is said to make 90 miles an hour, 160 miles an hour in second gear, and more than 240 miles an hour in top gear.

Ice may be used to cool the water used in the engine.

Speed tests at Daytona Beach are expected to start in March, the association said.

The present record of 207.552 miles an hour is held by Ray Keech, American driver.

Educating the Negro

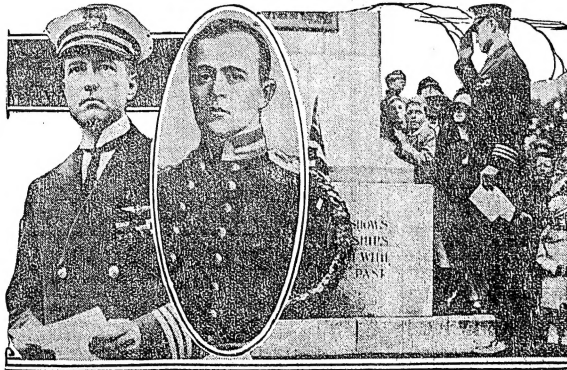

During the last ten years, colleges for negroes in the United States have doubled in number, and have increased their enrolment six hundred per cent. Special attention is being given to the training of men and women for professional work, and yet there is but one negro physician amongst 3,343 of the negro population, while there is one white doctor to every 53 whites.

Rubbing It In

Miss Leftover—Dad's going to give me a carved cedar horse chest for a birthday present.

Miss Tartle—That'll be nice. Cedar's mothproof, so your things will keep years and years in it.

PAYS TRIBUTE TO DEAD EXPLORER

En route from the United States to Antarctica in an attempt to reach the South Pole by air, Commander Richard E. Byrd, stopped over at Christchurch, New Zealand, to lay a wreath upon the memorial erected there to Captain Robert Falcon Scott, the British explorer, who reached the South Pole on January 17, 1912, but who lost his life on the return trip, dying of cold and starvation when within eleven miles of one of his food and supply depots. In the illustration the American leader is seen as he appeared at Christchurch while delivering a eulogy of the Briton's achievement and character. (2) is a picture of the late Captain Scott, while (3) shows Byrd saluting the Scott memorial at Christchurch, after having placed a wreath at its base.

The Staggering Load Carried By the British Government As A Result Of the Great War

Flower Guide For All Canada

A New Edition Of A Most Useful Work Is Now Available

The bulletin "Annual Flowers," issued by the Department of Agriculture, at Ottawa, although published in large editions has had to be repeatedly reprinted to meet an extraordinary demand for it. A new edition of this wonderful useful work by Miss Isabella Preston, specialist in ornamental horticulture at the Experimental Farm, Ottawa, is a very attractive booklet, which not only describes the thousands of varieties but shows many of the blooms arranged in vases, as well as general views of flower beds and borders.

This bulletin is useful as a guide in all the provinces, as it gives the names of twelve varieties that have done best at each of the twenty-one Experimental Farms and Stations distributed over the different provinces.

This booklet, which is Bulletin No. 60, and available at the Publications Branch, Department of Agriculture, Ottawa, is a trustworthy guide to one when studying the seed catalogues that arrive in the homes at this season of the year.

Lead Production In Canada

Greater Part Of Lead Produced In Canada Mined In B.C.

Much the greater part of the lead produced in Canada comes from the refinery at Tadanac, British Columbia, which treats lead concentrate from the Sullivan lead-zinc mine at Kimberley. The output of this mine far exceeds that of all other Canadian lead mines put together. There is also a considerable production of numerous silver-lead and silver-lead-zinc mines in the Kootenay districts and other parts of British Columbia. The Yukon output is silver-lead ore from the Mayo district; that of Ontario is derived from galena, at the Galena mine, in Carleton County; and Quebec's output is lead concentrates from the Notre-Dame-des-Anges lead-zinc mine.

Keeps Things Shining

United States Ships Shoe Polish To Many Nations

Uncle Sam is one of the world's busiest boot-blacks. He helps shine the shoes of other nations.

This became evident when the Department of Commerce announced that 2,781,820 pounds of shoe polish valued at \$765,325 was shipped by American firms to other countries during the first ten months of 1923.

The greater part of this went to provide glittering shoes and boots for Cubans, Canadians and South Americans. Europe, the report showed makes most of her polish at home.

Housewife (employing new girl)—I hope you had no quarrel with your last mistress when you left her?

Maids—Oh, no! She was taking a bath and I just looked her in, took my belongings and left.

By religion, the Tamil Indian will not eat flesh.

On of the most striking statements issued recently by the British Government in relation to the burden of debt entailed by the Great War, was the announcement made by the Minister of Pensions, who said that by March, 1923, \$4,300,000,000 would have been expended in pensions to injured and disabled ex-service men. This is an astounding statement, and speaks convincingly of Britain's gigantic effort in the terrible struggle of a decade ago. The number on the pension roll totals 970,000, aggregating with dependent wives and families, 1,500,000 persons. Final awards on life pensions were granted to 370,000 officers and men.

In the 11 years of its administration the department has spent on medical treatment \$275,000,000; on special allowances to patients and families during treatment \$172,500,000, and is spending yearly on this branch of work \$15,000,000. Since 1927 the Ministry of Pensions and the Ministry of Labor have expended over \$240,000,000 in the training of ex-service, disabled and other men, including allowances to families during training. A sum of \$50,000,000 was spent in civil disabilities grants. The number of unemployed disabled men has been reduced to 19,000, of whom only 7,000 are classified as men whose disablement makes it difficult for them to work at their former occupations, or at similar ones.

Moreover, the policy adopted of persuading employers to give work to disabled men has led to the engagement of \$300,000. The expenditure of the Ministry of Pensions for the current year is \$285,000,000. A comparison of statistics shows that while Great Britain has actually expended \$3,935,000,000, France has spent \$2,250,000,000, and Germany \$1,750,000,000. One creditable feature of the statement is that the percentage of unemployment among disabled ex-service men is smaller than among the civilian population.

In addition to this tremendous outlay for pensions to disabled men, Britain has been paying for the debts to the United States which were contracted by the Allied nations, and which were guaranteed by the British Treasury, as well as providing for the recovery of the nation from the economic impoverishment caused by the war. It is a record of which the people of the British nations everywhere may well be proud.

Research Bureau

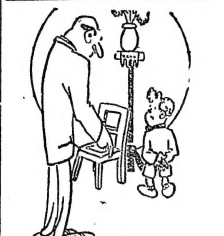

Empire-Wide Research Bureau Would Greatly Benefit Canada

In the opinion of Dr. J. H. Grisdale, Deputy Minister of Agriculture, and others sponsoring the Empire-wide Research Bureau, the Dominion will stand to benefit materially by such an organization. The Bureau will give special study to soil science, animal nutrition, animal health, animal genetics, agricultural parasitology, plant genetics and fruit production. The chairman is Sir Robert Greig, who is chairman of the Scottish Board of Agriculture, and was a recent visitor to Canada.

Oldest British Doctor Dead

Sir David Maurice Serjeant, believed to be England's oldest doctor is dead at the age of 90. A poet as well as a man of medicine, the late Sir David Serjeant had a long and varied career. He was knighted at the age of 91 for his patriotic poetry.

A group of Indian women, aided by English and American women, are actively working for the betterment of women in India.

"Come here and be spanked, Toto."

"But I haven't done anything."
"No, but I shan't be here tomorrow to see your school report." —Tote Mele, Paris.

CONSTIPATION RELIEVED QUICKLY

CARTER'S LIVER PILLS

This Purge Vegetable Fill will move the bowels without any pain and depressing after effects. Sick Headache, Indigestion, Bilelessness, Bad Complexion quickly vanish. Children and Adults can easily swallow Dr. Carter's tiny, sugar coated pills. They are free from calomel and poisonous drugs. All Druggists etc and the red pills.

WORLD HAPPENINGS BRIEFLY TOLD

The Kellogg anti-war treaty has been ratified by the Senate at Washington.

An increase of \$25,000,000 in the fund for prohibition enforcement has been approved by the U. S. appropriations committee.

Captain Hermann Koehl, pilot of the first westward trans-Atlantic airplane, Bremen, was injured at Arosa, Switzerland, when he crashed while sking.

American "Friends of the Prince of Wales" have come forward with an anonymous gift of \$100,000 for the relief of distress in the coal fields. It was announced in London.

It is understood the salary of Sir Basil Blackett, newly appointed chairman of the merger company controlling Imperial wireless and cable communication will be \$40,000 a year.

A fund opened by a Toronto newspaper for relief of the unemployed of Great Britain reached a total of \$28,044. The money was sent to swell the Lord Mayor's fund being raised throughout Britain.

It has been decided that the United Service Institute, a scientific and literary body composed of military, naval, air force and Royal Mounted Police officers of the capital and district, is to be organized and incorporated.

An attempt is being made to persuade a 15-year-old Turk to visit Canada as mascot of a football team according to Z. G. Benjoun, of Constantinople. Two sons, aged 120 and 90, are assisting in the attempt to persuade him.

Searchers recovered the bodies of three Alpine climbers who were buried by an avalanche while climbing Mount Zevce west eight other climbers. The accident occurred near the summit of the mountain, which is 8,000 feet high.

THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the Ideal Remedy For Babies and Young Children

Canadian mothers are noted for the care they give their little ones—the health of the baby is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mothers have found such a remedy in Baby's Own Tablets and many of them use nothing else for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

An editorial typist has lost her job for sending this to a contributor: "The editor regrets that he is unable to make use of the enclosed owing to lack of space."

The Friend Of All Sufferers.—Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to every one and realizes it by stilling suffering everywhere. It is a ointment that has the blessing of half a continent. It is on sale everywhere and can be found wherever enquires for.

Disgruntled Patron (leaving cinema)—"I've never seen a rotten picture!"

Commissionaire—"Ever had yer photo took?"

Always Keep Cuticura Preparations On Hand

The Soap, because of its absolute purity and emollient properties, is unsurpassed for every-day use. Assisted by Cuticura Ointment it does much to keep the skin and scalp healthy. Cuticura Shaving Stick makes shaving easy for tender-skinned men. Cuticura Talcum is the ideal toilet powder.

Sample Size Free by Mail. Address: Canadian Dispensary, 2500 Broadway, New York, N.Y. Write for list of all sizes. Talcum 10c. Cuticura Shaving Stick 25c.

Industrial Manitoba

Agriculture Has Now To Take Second Place To Manufacturing In Western Province

Agriculture now has to take second place to industrial manufacturing in Manitoba, according to figures of the Industrial Development Board. An estimate made by the Board places the output of manufactured goods in Manitoba this year at \$159,252,000, as compared with \$132,000,000 during 1927. The agricultural wealth produced in 1927 was placed at \$147,000,000.

"Flu" "Flu" "Flu" It Is Everywhere

DANGEROUS PNEUMONIA MAY FOLLOW UNLESS A GOOD RECOVERY IS MADE

With so much Grippe and Flu about, no one can afford to neglect even a simple cold. For a real protection against "Flu" many experienced nurses advocate the following simple treatment. Put a saucupan containing one pint water on the stove; then add one-half teaspoonful of Catarrhazone, bring to a boil. Bend over the steaming water; wrap a towel over your head so that it also covers the face. Let the steam rise so you can inhale it. Breathe in the vapor deeply. The healing fumes of Catarrhazone will quickly disinfect your nose throat and lungs. Flu germs are destroyed.

You can prevent Grippe, Flu and Influenza by using Catarrhazone. It is healing, soothing, safe and efficient. To stop colds, sore throat, or Catarrh, nothing is more satisfactory than Catarrhazone. Even to sit in a room with Catarrhazone Vapor rising from a pan of boiling water is a wonderful protection to children and overcomes all sorts of winter coughs and colds. All druggists sell Catarrhazone, 50c. a bottle.

Platinum In Canada

With the exception of a very few ounces of platinum obtained from the black sands of British Columbia, all the Canadian platinum and allied metals are obtained from the treatment of the Sudbury, Ontario, nickel-copper matte. The precious metal residues are allowed to accumulate over irregular periods before being treated, so that recoveries do not bear any definite relation to the quantity of matte treated in any particular year.

Will Burn Ice

Burning out of ice on the St. Lawrence River will be attempted by Dr. Howard T. Barnes, of McGill University, with whom the government has made an agreement from the department of marine and fisheries, the purpose being to free Montreal harbor from the grip of winter earlier than usual and to prevent the flooding of the country between it and Sorel.

Offer Reward for Cancer Cure

The grand council of the British Empire cancer campaign has announced approval of an offer of two prizes of \$2,500 each, in 1931 and 1932, for the best original piece of work in the investigation of cancer carried out in the British Empire.

Canada's Iron Industry

Hamilton and Sault Ste. Marie in Ontario, and Sydney, in Nova Scotia, are at present the great centres of the iron industry in Canada.

Miller's Worm Powders not only exterminate intestinal and other worms, but they are a remedy for many other ailments of children. They strengthen the young stomach against biliousness and are tonic in their effects where the child suffers from loss of appetite. In feverish conditions they will be found useful and they will serve to allay pain and griping in the stomach, from which children so often suffer.

Medical men will continue to walk in Bermuda. The House of Assembly has refused to make exceptions to a law prohibiting use of cars on the island.

Use Minard's Liniment for the Flu.

Times change, and now the parent who provides spending money and doesn't interfere is called a good scout instead of a fool.

The silencer for firearms was invented by Maxim in 1900.

First American Forest Law

Was Written In Massachusetts Colony On March Twenty-Ninth, 1626

The Pennsylvania department of forests and waters at Harrisburg, recently conducted an investigation revealing that the first American forest law was written in the New Plymouth Colony, in Massachusetts. The original American forest law read as follows:

"Orders agreed on several times for the general good of the Colony:

"It was decreed by the Court held on the 23, of March Anno, 1626, That for the preventing of which inconveniences, as does and may befall the plantation by the want of timber, that no man of what condition soever sell or transport any manner of works or frames, for houses, plants, boards, shipling, shalop, boats, canoes or what so ever may tend to the destruction of timber aforesaid."

Columbus As a Spaniard

Document Found Recently Would Indicate Birthplace of Explorer As Being In Spain

A document found in the archives of Pontevadera parish in Spain, mentioned that place as having been the birthplace of Christopher Columbus. It thus bears out the claim that the discoverer of America was a Spaniard and not a native of Genoa, Italy. The document contains a description of the burial of Columbus and said that the Duke of Veragua, descendant of the mariner, had sold in the 18th century the lands on which stood the building where Columbus was born.

Theory Of Relativity

Prof. Einstein Places Great Value On A Manuscript He Has Recently Completed

Prof. Albert Einstein has submitted to the Prussian academy of sciences a manuscript of five pages which it took him ten years to complete and which he considers of more importance than his widely discussed theory of relativity. The manuscript contains mathematical and physical formulas amplifying the theory. It is a treatise in abstract mathematics dealing with the problem of merging mechanics and electric-dynamics.

Expensive Conversation

It costs big money to indulge in telephone conversations. A London visitor recently called an American business associate and talked 93 minutes. His bill was close to \$1,425.

A pleasant medicine for children is Mother Grave's Worm Exterminator, and it is excellent for driving worms from the system.

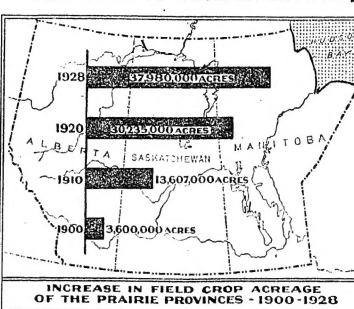

Saskatchewan mined 470,000 tons of coal during 1928, according to an announcement received from Ottawa. This is the same amount as was produced in 1927.

Groundwood Pulp

Groundwood pulp formed 58 per cent. of the total quantity of pulp made in Canada in 1926.

The difference between learning to drive a motor and learning to play golf is that when you learn to play golf you don't hit anything.

THE POWER OF WESTERN GROWTH.

Contrasted with its spectacular speed in pre-war days, the course of prairie settlement in recent years has seemed slow and subdued. But as a matter of cold fact, despite the absence of sensational features, the expansion of agriculture on the prairie has been plowing ahead with tremendous power. The rate of advance, as indicated by Dominion Bureau of Statistics reports, is little short of amazing. Between 1920 and 1928, Manitoba, Saskatchewan, and

WEIGHING OF FOOD

You have suffered the annoying experience of having stringy foods wedge between your teeth; and you wonder what can be done to remedy this.

Normally, teeth should be tight together with rounded contacts as when two marbles touch, but through tooth decay and from teeth "drifting" this contact is lost.

The food then "wedges" between the teeth and is held there until released—with what results?

Obviously, decay is liable to be incited in this area.

Also this impacted food material presses upon the soft underlying tissues, until they become irritated and inflamed. Thus injured, they lose their "tone" and fall an easy prey to the microorganisms that cause disease.

Then follows the destruction of this wedge shaped tissue between the teeth; a "pocket" is formed, which, becoming infected, results in the progressive destruction of the supporting structures of the teeth, which are then lost.

You see then, what grave damage can result from so simple a cause.

Now, the remedy. It is the tooth-pick, which, through its indiscriminate use, may do further harm, and which at best provides but temporary relief.

But, where this "wedgeing" is first noticed, the insertion of a filling in one or both of the involved teeth to restore the contact, will clear up the trouble.

This may even necessitate the removal of a faulty filling already in place but far better this than to suffer the prolonged discomforts from "wedgeing" food, with its train of grave consequences, should it go unchecked.

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Infection, followed often by death may result from paring corns with an infected razor. Quick, safe relief comes from using PUTNAM'S CORN EXTRACTOR. If afflicted with corns, callouses or sore foot-horns, use "PUTNAM'S"—it's reliable, and sure to survive up the corns so they drop right off. No pain, no sores, but quick relief from sore corns comes to all who use PUTNAM'S PAINLESS CORN EXTRACTOR. 25c. at all dealers.

Modern Books Short Lived

The life of modern books is much too short. When a good novel comes out it has its time of triumph, which seldom lasts beyond a year. After that it falls out of discussion, and instead of regiments of readers there are none at all. In July 200,000 people may be seeking a book and talking about it, and even reading it, and then with the first frost the matter is dropped entirely. When a popular success begins to decline it falls faster than an albatross.

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, sure, and satisfactory relief.

The latest wonder of agriculture, is a cabbage plant which produced six heads of cabbage in turn, one above the other.

SUNDAY SCHOOL LESSON JANUARY 27

THE HOLY SPIRIT

Golden Text: "For as many as are led by the Spirit of God, these are sons of God."—Romans 8:14.

Lesson: Joel 2:28, 29; Luke 11:9-13; John 3:5-8; 14:18; 17:26; 15:26, 27; 16:7-15; Acts 2:1-21, 32, 33; Romans 8:1-17, 26, 27; 1 Corinthians 12:1-13; Ephesians 1:3, 14; 3:14-21; 4:1-6, 30.

Devotional Reading: John 14:26-31.

Explanations and Comments

What the Holy Spirit Will Do, John 14:26.—Jesus told His disciples that it was expedient for them, it was for their advantage, for their best interests, that He should leave them. How could it be best for them to lose the daily companionship of their Lord and Master? Jesus gives the answer: "For if I go not away, the Comforter will not come unto you; but if I go, I will send him unto you."

The Greek verb from which the Greek noun Paraclete, Paraclete, is derived, means to call to aid; the noun, therefore, stands for one who is called to another's aid, whether to comfort (comforter), to plead his cause (The Advocate), or to help in some other way (The Helper). The word means One who strengthens, holds, rather than One who consoles. The Holy Spirit is (1) the continued life and presence of Christ Himself better after He had left them.

(2) While Jesus was with them, they were weak men, unable to stand alone. After He went away and left them as witnesses to carry on His work, they became towers of strength, wonderful leaders of men, who continued to do all that He began both to do and to teach. (3) By leaving a few, Christ became the Companion of all. While He was on earth He was with a few men in a small land; now He is with all, everywhere, at all times. He is the universal Spiritual Presence.

"He to His own a Comforter shall send. The promise of the Father, who shall dwell His Spirit within them, and the law of faith. Working through love, upon their hearts shall write To guide them in all truth."—Milton.

"We have no outside, distant, occasional Saviour, as the disciples had long ago; but His Spirit, His other Self, to abide with us, in us, today, tomorrow, forever."—Malcolm D. Babcock.

Men outnumber women in the Irish Free State; the number of males being 1,565,889 compared with 1,465,103 females.

Honey production in British Columbia in 1928 is valued at \$216,855 and bees-wax at \$3,000. This yield is from 19,213 hives.

One million, four hundred and ninety thousand, three hundred and forty cows supplied milk to creameries in Canada during 1926.

Customer (doubtfully): "Is it a pedigree dog?" Dealer: "Pedigree! Why, if this dog could talk he wouldn't speak to either of us!"

More than half of the known elements are metals—about 50 in all.

"Buckley's" For Throat Health

A hot night and morning relieves soreness and hoarseness, and prevents more serious throat trouble. A bottle of Buckley's—40 doses for 75 cents—is an economical guarantee of better throats for the whole family. Pleasant to take—instant relief—positive in result. All druggists sell it.

Must Keep Drama Clean

Bransby Williams, English Actor, Deplores Modern Tendency

"I am ashamed of the way in which the stage is being run in the United States, Canada and Great Britain," Bransby Williams, English actor, said in addressing the Brockville Rotary club, adding that, for the sake of the rising generations, the stage has got to be kept clean and the pictures "must be kept cleaner." In moving-picture theatres, he said, boys and girls are today reading titles that are despoiling the English language, and on the stage itself there appears to be no longer room for good, clean, beautiful plays, while the bookstores are full of questionable reading matter.

UNITED FARMERS ASK FOR BETTER FREIGHT RATES

Vancouver.—Backed by the United Farmers of the three prairie provinces, the United Farmers of B.C. will carry British Columbia's claim for better freight rates to the governor-in-council at Ottawa.

The appeal has been prepared and forwarded to Ottawa by G. G. McGee, K.C. The appeal involves three requests: That export grain rates on the Canadian Pacific Railway to Vancouver be reduced to the level obtaining at Fort William; that domestic grain and flour rates over both trans-continental lines be reduced to the level obtaining at Fort William and the removal of the mountain differential in all freight rates covering the movement of all traffic into, from or through British Columbia.

Mr. McGee will conduct the case at Ottawa when argument is heard. Mr. McGee will also continue his appeal to the board of railway commissioners for leave to appeal to the Supreme Court of Canada from the commissioners' decision in the matter of domestic grain rates.

Mr. McGee announced his intention of appealing direct to the governor-in-council before the board of railway commissioners. Later, however, when the board gave permission to Leon J. Ladner, K.C., who represented the attorney-general of British Columbia, permission to make formal application for extension of time in which the appeal would be made, Mr. McGee said that if the attorney-general was going ahead with the appeal he was also going to ask for leave to appeal on behalf of his clients to the supreme court.

J. E. McMullen, acting for the Canadian Pacific Railways, said the application was one that should be answered by the full board at Ottawa. E. W. Hamilton, counsel for the Canadian National Railways, supported Mr. McMullen's argument. The chief commissioner, H. A. McKeown, said that in view of the circumstances connected with the application, and the fact that no notice had been given the railways, the application might very well be heard in Ottawa.

Favor Old Age Pensions

Lethbridge, Alta.—Old age pensions will be urged upon the Alberta government by the Alberta Federation of Labor as a result of a resolution passed by the delegates at a recent session. Alberta is the only western province which has not now this legislation in force and the labor men are determined that enabling laws shall be passed at the coming provincial session.

Gigantic Wave Strikes River

New York.—Leonardo Fioroni, cook, was killed and several other members of the crew were injured by a gigantic wave that surged over the bow of the White Star liner *Maestri* on the crossing completed when the ship docked here. The wave twisted steel bulkheads, wet the hull, ruined part of the cargo and necessitated removal of the 280 third class passengers to other quarters.

Gift For McGill University

Montreal.—A gift of \$5,000 has just been received by the McGill faculty of applied science from Walter W. Colpitts, of New York, to establish a graduate scholarship in civil engineering at the University in honor of Dr. John Densill Porter, emeritus professor of mining engineering. Mr. Colpitts graduated in 1899 from McGill faculty of applied science.

Again Heads Alberta Farmers

Edmonton.—Opposition to re-election of H. W. Wood as president of the U.F.A., was drowned in a vote which swept him into the first executive office for the fourteenth time. To a motion that he be "retired" as honorary president was added an amendment that he be made president. The amendment was passed by overwhelming vote.

Increase In Dairy Products

Fredericton, N.B.—The value of cheese, dairy and creamery butter in Canada during 1928 will show an increase of more than \$11,000,000 over the preceding year. F. P. Singleton, chief of the dairy markets division of the federal department of agriculture, told delegates to the New Brunswick Dairymen's convention in session here.

W. N. U. 1789

Discussed Problems Of Egg Marketing

Canadian Producers' Association
To Take Matter Up With
Government

Toronto.—Egg marketing problems were discussed at the annual convention of the Canadian Producers' Association here. In view of the unprofitable situation which has confronted the dealers on account of surplus supply it was decided that a committee be named to take the matter up with the Dominion government. W. S. Cameron, Toronto, president of the association, suggested that the committee be representative of dealers, exporters and producers.

Alfred McCann, of Cheltenham, Ont., urged that advertising calculated to insure the consumption of eggs should be undertaken by the government. Mr. Cameron in his presidential address, stated that the season had been a profitable one for the egg producers but on the average it had been unprofitable for the dealers. Consumption per capita in Canada had risen from 16.00 dozen in 1921 to 29.67 in 1927, and he expected the 1928 figures to show more than 30 dozen per capita.

Reparations Conference

Reported Meeting Will Be Held
In Paris In February

Paris.—It has been intimated that the reparations conference will meet in Paris about February 9, and in addition to Owen D. Young, former general of reparations, J. Pierpont Morgan is expected to take an important part in the discussions. As far as could be learned from a canvass of the interested officials no one seems to have any definite plan to submit. All the experts have ideas and some have a few constructive suggestions, but none have extensive programs.

The British experts, it is understood, will assume a waiting attitude, and the initial discussion is expected to be between France and Germany. The Italians will content themselves with trying to retain what they have already secured and Japan will trust to what turns up.

Great Increase Shown In Canadian Trade

Advances of Nearly \$25,000,000 During Last Nine Months
Ottawa.—Canada's total trade advanced nearly \$25,000,000 during the last nine months of 1928. The total of \$2,007,890,158 compares with \$1,773,092,834 for the corresponding period in 1927.

Figures were made available at the department of national revenue. Domestic exports were valued at \$1,071,677,164, an increase of \$151,542,797 over the comparative figures of \$920,104,367 in the previous year. Wheat exports alone moved upward more than \$81,000,000, while newsprint and automobiles were substantially heavier.

Air Pilot Killed

Toledo, Ohio.—Ted Hay, 30, pilot, Transcontinental Air Transport Company here, was killed when his plane crashed as he was attempting to land. Witnesses said one of the wings of Hay's ship collapsed as the aviator soared 75 feet above the field for his landing. The low altitude apparently prevented him from righting the plane.

Will Participate In Scheme

Regina.—Manitoba will again participate in the British boy immigration scheme it has been announced by Hon. Albert Prefontaine, Minister of Agriculture for Manitoba who stated that a requisition would be forwarded to the British authorities to bring 50 youths to that province this spring.

Find Tanks of Amundsen Plane

Paris, France.—The French builders of the *Latham* plane in which Roald Amundsen and his companions were lost while hunting the wrecked dirigible *Italia*, in the Arctic, announced that fuel tanks found floating off Norway exactly conformed to those used on the Amundsen plane. Five others were lost with the famous explorer.

Receives New Appointment

Ottawa.—Canada's recently appointed chief of staff of the Department of National Defence, Brig. Gen. A. G. L. McNaughton, has been elevated to the rank of Major-General. The appointment is post dated to take effect from January 1, 1929.

Will Sail For England

New Earl of Egmout to Leave
About 2nd of February

Calgary.—The new Earl of Egmout, Frederick Joseph Moore Percival, who for the past thirty years has been ranching in the Calgary district and who recently left him to a big estate in Great Britain, will leave about the end of February for England.

He will be accompanied by his fourteen-year-old son and heir, the Hon. Frederick George Moore Percival, and Mr. and Mrs. Harry Trimmer, of Pridals, who have been friends of the new earl for many years.

Farm Loan Board

Ottawa.—While no announcement has yet been made as to the personnel of the farm loan board which will act with Dr. J. D. McLean, former Premier of British Columbia, and recently appointed to the chairmanship of that body, the understanding in the capital is that Hon. E. C. Drury, former premier of Ontario, and Beaudry Lemah, president of the Banque Canadienne Nationale, will be named.

GERMAN PLAN FOR NEW CRUISER IS PUBLISHED

Berlin.—Publication by the London Review of Reviews of the text of a secret memorandum in which General Groener, German minister of defence, defended the necessity for the construction of a new battle cruiser has caused considerable consternation in government circles here.

As the memorandum was known only to cabinet members and a restricted number of persons official quarters are at a loss to explain how the "leakage" took place and an investigation has been ordered.

It is considered in Berlin that there is no doubt the London publication was from the original text, and the indignation of the press is increased because the memorandum was withheld even from members of the Reichstag, who are determined to interrogate the government on the "scandal".

London.—Wickham Steed, editor of the Review of Reviews, said that the Groener memorandum he had published is "perfectly authentic and was not stolen".

"It reached me in an ordinary way through a channel that I trust, and I satisfied myself as to its authenticity. They can make all the investigations they like as far as I am concerned."

RETIRES FROM BUSINESS

After 42 years as assistant manager of western business for the Canadian Bank of Commerce, C. W. Rowley has retired from business. He is recognized as one of the leading bankers of Canada, and is well known in the west.

Railroad Wreck Was Caused by Drunkenness

Roumanian Train Crew Responsible
For Death of Fourteen Persons

Turmeuseviciu, Roumania.—Railroad inspectors said that drunkenness on the part of the engineer and crew of the Bucharest-Turmeuseviciu express cost the lives of 14 persons. In addition to the fatalities about two score passengers were injured at Pruniscu, near here, when the express crashed into a local train which had been derailed.

The express was plunging along at 55 miles an hour in the dead of night when the crash occurred. The engineer of the express, which was heavily laden, was apparently blind to all signals. In their excitement over the derailed local train station officials apparently forgot about the onrushing Ducharast express, which ploughed into the passenger coaches of the local train like a catapult.

Salary Revision For Mail Clerks

Ottawa.—New classification and salary revision for mail clerks throughout the Dominion is considered probable by J. P. O'Farrell, of Quebec, president of the Dominion Railway Mail Clerks' Association. Mr. O'Farrell expressed himself thus after appearing before the Civil Service Commission with proposals along these lines.

Children Victims of Ranch Fire

Winnipeg.—Two young children, one six months old and the other two years, were burned to death when fire destroyed a ranch home near Arden, Manitoba, south of here.

CANDIDATE FOR THRONE

Count Folke Bernadotte, of Sweden, shown above, with his bride, formerly Miss Estelle Manville, of Pleasantville, N.Y., is one of the two foremost candidates for the throne of the United Kingdom, which it is proposed to form by merging Esthonia, Latvia and Lithuania.

Woman Leads Defence In Murder Trial

Praised For Plea in Old Bailey, But
Failed to Receive Acquittal

London.—Miss Venetia Stephenson failed to secure acquittal at the central criminal court of the first man she had defended on a charge of murder, John Holmy Ward, aged 21. The jury without much delay returned a verdict the prisoner was guilty of the murder of his grandfather, a bookmaker, who was found with his skull fractured in Fimlico. But she received the warmest congratulations upon her case for the defence from Mr. Justice Humphreys.

Miss Stephenson achieved any attempt at rhetoric. "I am fighting for this young man's life and it would fail me if it is because I appreciate the responsibility that rests on me," she said.

Miss Stephenson, however, used carefully chosen sentences when she passed to a review of the evidence, urging the manner in which the accused's grandfather met his death was consistent with the younger man defending himself from attack by the elder.

"I know you will not let sympathy for the dead over-ride justice for the living," were her last words. "This is the most solemn moment of my life and I leave this young man in your hands, with a prayer that God might lead you to the right conclusion."

His Lordship in summing up said it was difficult to accept the theory of self-defence.

Western Pioneer Dead

Major Augustus Mills Came to
Winnipeg in 1870

Winnipeg.—A pioneer of early western Canadian military expeditions, Major Augustus Mills, 79, is dead at his home here. He came to Winnipeg in 1870 as a member of the first Lord Dufferin expedition and later participated in the rebellion in 1885 as a captain in the Kildonan Infantry, which made a far western march in search of the Indian chief, Big Bear.

For a time he was a Dominion government land agent and then, in 1883, was appointed deputy provincial secretary at the Manitoba law courts, a position which he held at the time of his death.

APPROVE NEW RURAL SCHOOL PLAN IN ALBERTA

Edmonton.—Approval of the Baker rural school plan, sponsored by the Alberta government, was voiced by the convention of the United Farmers of Alberta here. A vote, taken on the questions, favored approval of the Baker system by 205 to 164. According to the resolution the convention favored raising funds by grouping rural school areas in one district under a flat mill rate on assessed valuation.

Hon. P. H. Baker, minister of education in the Alberta government, was the most prominent figure in the discussion on the system which bears his name. In the midst of a debate he was summoned into the argument at the request of the farm delegates. After outlining his system, the minister of education answered queries on the matter until the program was halted. According to the projected system, the province would be divided into 20 divisions of 10 school districts each. Chairmen of the district boards to form a general board, which, with the minister of education, would supervise rural educational matters in Alberta. Selection, placing and payment of teachers under the Baker plan, would be handled by the general board.

In the discussion on the Baker idea "government by proxy" was quoted as a name for the proposed mode of rural educational supervision. It was claimed that, regarding single taxation areas, "none would stand for a blanket tax assessed by a bureau of the government."

In answering his critics, Mr. Baker denied the "bureaucracy" and "government by proxy" allegation, and stated that matters would be governed by appointed representatives of the ratepayers. He estimated that the increase in taxation, necessary to pay for the better supervision the new system would involve, would be covered by a three-quarter mill increase over the entire rural area. And he contended that the new plan would place experts in the field of the allocation and selection of teachers.

TAX REDUCTIONS ARE URGED BY MANUFACTURERS

Hamilton, Ont.—The report of the special committee on taxation was presented at a meeting of the Canadian Manufacturers' association. It recommended consideration by the government of a method to avoid "double" and in many cases triple taxation, which, it was held, occurred through taxation of net earnings of corporations and the personal income tax, which applied to dividends. Reductions of the personal income tax, reduction and final abolition of the sales tax, and a reduction in the excise taxes on finished goods were other recommendations.

An important closed meeting of the council of the association was held at which over 200 members from all over the Dominion were present. A luncheon was also held, when Sir Joseph Flavelle, Toronto, spoke on "Industrial Research." He said: "Premier Ferguson, some time ago promised \$1,000,000 towards industrial research if the association raised a similar amount. We have since collected \$350,000, and the premier has challenged us to make that \$2,000,000, with the promise that the government would advance a like amount. It is for us to accept this challenge," said F. P. Monceppeny, chairman of the Ontario division of the C.M.A.

Sir Joseph Flavelle said that Canadian manufacturers were behind their British and American competitors in applying science to their business.

Capital of Barclay's Bank

Amount Will Be \$500,000 With
Same Sum as Reserve

London.—Barclay's Bank of Canada, when incorporated, will have a capital of \$500,000 and a reserve of a similar amount, F. C. Goodenough, chairman of Barclay's Bank, Limited, said at the annual meeting.

Sir Robert Laird Borden, former premier of Canada, had accepted the chairmanship of the new bank and the directors included Premier L. A. Taschereau of Quebec, he added.

Application for a charter for the bank will be made at the coming session of the Canadian parliament.

Free Trip Offered Students

Paris.—A free trip from Montreal to Paris with expenses for a 15-day sojourn at his hotel to the student graduating with highest honors at Canadian Universities is to be offered by J. G. Mettraller, administrator of a Paris Hotel, if arrangements can be made with Canadian University heads. Mettraller is president of several hotels in France and Switzerland.

To Aid Paraguay Farmers

Asuncion, Paraguay.—The Paraguayan government decided to set aside 25,000,000 pesos credits to farmers who are unable to harvest their grain because of the absence of farm hands in the army mobilized recently in the dispute with Bolivia. The government also is trying to demobilize the farmers first and as quickly as possible.

Ask Customs Rebate

Ottawa.—The government is being asked by the British Columbia Sugar Refining Company to include in the forthcoming estimates the sum of \$36,821.88 with interest, being the balance of \$59,355.83 claimed to have been overpaid by the company in custom duties.

Graf Zeppelin's Next Trip

Frederichshafen.—The next important flight of the trans-Atlantic dirigible Graf Zeppelin will be at the end of February, when the big airship will fly to the pyramids of Egypt and on to Palestine. It has been announced. The dirigible probably will moor en route.

Hundreds Killed By Earthquake

Peking, China.—Hundreds of Chinese were killed in an earthquake in the Northwest part of Shansi province, dispatches published here said. The earthquake occurred near the Mongolian border in a section suffering from a famine.

Fear Revolution

New Orleans, La.—Isaac Lehman, representative of a New York cotton goods manufacturer, arrived here with a report that United States citizens and other foreigners were fleeing Spanish Honduras in expectation of a revolution.

Europe Knows Canada Better

Visitor From Britain Says Investors
See Dominion As Worth While

"Every year there is a more intelligent conception of Canada in the minds of the people, not only of the British Isles, but of the European countries in general," said C. J. Smith, European vice-president of the Canadian National Railways, who is visiting Canada, for the first time in two years, to discuss matters with the Canadian National officials as well as with officers of the shipping organizations with which the Canadian National has its traffic connections. He will visit the company's territory both in Canada and in the United States.

Mr. Smith said it would surprise Canadians to learn how well the principal characteristics of Canada were now understood abroad. The visit of Sir Henry Thompson to Europe, during the past year, brought Canada to the front as never before, and people at present are extremely sensible of the prosperity which exists in this Dominion, together with the opportunities available for investment here.

"There is no chance of the interest in Canada diminishing. The activities of the leading British financial men, such as Lord Metchett and other leaders in mineral and industrial fields of development, are having their effect of assuring the European investor that Canada is really worth while and is likely to become more so."

Speaking of the traffic and business outlook as between Canada and the British Isles and other European countries, Mr. Smith stated that the work of the Canadian National System in developing both trade and travel, emigration and settlement, was being constantly extended over Europe. During last year, he said the Canadian National had handled more new settlers into Western Canada than ever before, there being an increase of 25 per cent. over the figures for the preceding year. "In addition to this growing emigration traffic, there is a constant growth in the freight handled by our system between Canada and Europe in both directions, and there is also a healthy growth in the tourist travel. The Canadian National is represented in virtually every European country today, though in the matter of attempting to provide satisfactory settlers for the vacant lands of this Dominion, our efforts are chiefly confined to securing British and Nordic people generally, and getting for Canada those immigrants who are likely to become good Canadian agriculturists."

"The Canadian railways," Mr. Smith continued, "are considered models of efficiency in operation, not only in Great Britain, but in other European countries, several of which, including France, are preparing to send groups of experts over here to study at first hand the principles followed in the management and operation of the Canadian systems. The launching and placing in service of the five new vessels of the Canadian National Steamships for the Canada-West Indies trade development had aroused keen interest throughout Britain. Mr. Smith said and it had demonstrated that Canada desired to develop facilities for the encouragement of her trade within the empire, and also that the Dominion was keen to take advantage of all opportunities offering for improving her position."

Production Of Canned Foods

The development in the production of canned foods in Canada has shown a remarkable expansion since the beginning of this century. The principal commodities thus preserved are fish, fruits, vegetables, milk and meats. The industry constitutes an important market for the tin, wooden box, paper, and printing trades.

"And how many times have you failed in your examinations?"
"Tomorrow will be the fourth."
Pages Gales, Yverdon.

Choosing Flowers For The Garden

The Right Varieties To Cultivate
With Hope Of Success

With the lengthening of the days and arrival in many homes of the seed catalogues, there come thoughts of gardening. When going through the attractive seed catalogues the ardent flower grower would like to add to his garden acreage so that he may be able to grow many of the beautiful plants pictured and described.

When one cannot extend his garden boundary it becomes a question as to the kinds of flowers and the varieties of them that one may grow with some hope of success. The booklet "Annual Flowers," issued by the Department of Agriculture, at Ottawa, is of great assistance to the flower grower, simplifying the selections to be made when ordering or planting the seed. This booklet, Bulletin No. 60, which has been written by Miss Isabella Preston, specialist in ornamental horticulture, at the experimental farm, and available at the Publications Branch of the Department, gives hints on the starting of annual flowers from seed and in growing them during the summer.

It also contains a very long list of varieties of annuals that have been tested at the experimental farms most of them during many successive seasons. Many of the flowers are illustrated and all of them described as to the colour, characteristics, and season of blooming.

A Queer German Law

No Come Back After Six Weeks If
Man Declared Dead In Error

In Germany, when you have been declared dead in error, you must protest that you are alive within six weeks of the date of the mistake or remain dead for ever after. This singular law is responsible for the fact that a soldier named Wothke, who was declared dead by a judicial error in 1912, is unable to enjoy the possession of his own property, which was dispersed to his heirs. Since the end of the war Herr Wothke has been trying to "come alive," but the authorities say they cannot do anything about it; he is legally dead, and they cannot, after so many years, resurrect him. The only Government department that has given him any satisfaction, if it can be called satisfaction, is the income tax office, which has been willing to receive his taxes regularly. Seaman Wothke has appealed to the Reichstag, and the Deputy, Herr Biedermann, has occupied himself with the matter, but without success. It is suggested that Herr Wothke might succeed in recovering his status if he committed a murder. A dead man cannot kill a live man, therefore, Wothke must be alive.

Educationalists Are Allies

Systems Differ But All Have One
Aim Says Hon. Vincent Massey

The realities of international affairs are nowhere better understood than in the realm of education, Hon. Vincent Massey, Canadian Minister at Washington, told the Association of American Colleges at Chattanooga, Tenn., adding that in the realm of the mind there can be no disharmony between communities.

"The educational systems of different countries may differ," he said, "but it is the habit of educationalists to regard themselves less as rivals than as allies in common cause." He spoke in praise of the purely collegiate institute, peculiar to the English speaking world, and stated "that youth might be fitted for public employment both in church and state."

Reparations And Debts

The New York Times says: "Our Government has consistently argued that German reparations do not concern the United States, and have no relation whatever to the war debts owed to our treasury by England, France and the others. The contention is, of course, legally correct, it may also be mathematically. In the documents on the treasury books, reparations are distinct from the war debts. Yet everybody knows that, in fact, they are linked together and cannot in the final settlement be kept apart."

Forms Northern Link

The Banff-Windermere Highway is the final and northern link in the great Grand Circle Tour. This route covers approximately 5,000 miles through Canada and the western United States, touching sixteen national parks, four in Canada and twelve in the United States.

Have you stopped your wife from buying antique things?
"Yes, I've just bought her a 1909 motor car!"

Corn For Poultry

Should Be Cracked And Scattered
Through Litter As Scratch Food

Whenever a mixture of grain containing whole corn is thrown to a flock of hens it will be seen that the corn will be quickly picked up by the birds in preference to the other grains. Unless one desires to fatten his birds quickly, corn, if fed at all, should be cracked and scattered in the litter so as to induce the exercise of scratching.

Yellow corn is better than white, because it contains fat-soluble vitamin "A," which is not present in the white. There is little or no difference in the feeding values of flint and dent corns.

Corn is rich in carbohydrates, and may be more freely used during the winter. The new edition of Bulletin No. 1, of the Department of Agriculture, at Ottawa, "Poultry Feeds and Feeding," points out the tendency of a wet mash containing corn meal to spoil if kept too long.

A New Occupation

"Airport Greeter" Is Title Of Texas
University Student

"Airport Greeter" is a new occupation. It does not necessarily require a college education but the first to follow the profession is a University of Texas student, the captain of the Longhorn football team, winner of the 1923 Southwestern Conference title.

"Gladhander" Ike Sewell will greet the air arrivals at the Fort Worth flying field. He is an airplane stunt pilot; spent a vacation touring Europe by bicycle and writes a sport column for six Texas newspapers.

Would Vote On War

A plan under which a war of aggression would not be waged by the United States until its declaration was ratified by a majority of the voters of the country was submitted to Congress by Representative Hamilton Fish, Jr., Republican, New York.

New Housemaid: "We took things pretty easy at 'last place.'"
Cook: "Well, you can't hear. They keep everything locked up."

War Medals Unclaimed

Not Only For World War But For
Fenian Raids And Red River
Rebellion

A total of 63,669 Canadians lost their lives either during the great war or died subsequently from causes directly attributed to war service. This is disclosed in the figures of plaques and scrolls that have already been issued from the department of national defence to the next-of-kin of the nation's fatal war casualties.

It is more than ten years since hostilities ceased, yet many of those plaques remain unused, while thousands of war medals continue to repose in the department unclaimed. This situation is not peculiar alone to the great war, of 11,990 Canadian service medals not yet delivered to their owners about 10,000 are for the Fenian raids of 1866 and 1870, and for the Red River rebellion of 1870. It is pointed out by G. J. Desbarats, deputy minister of national defence, that only those who received the bounty in connection with the Fenian raids are entitled also to the medal.

Feeding Hogs Is A Science

Success Assured If Supply Of Mineral
Mixture Kept On Hand

Although the pig may not know it, says a leaflet issued by the Ohio experiment station, he must have sodium, chlorine, calcium and phosphorus, if he is going to make good growth and return his owner a profit. For this reason many farmers keep a supply of mineral mixture.

Common salt supplies sodium and chlorine. Finely ground limestone or hardwood ashes furnishes calcium, while steamed bone meal provides phosphorus. This mixture, containing equal parts of salt, finely-ground agricultural lime and bone meal is widely used for cattle, as well as for hogs. It cures the habit developed by many cows, of chewing boards and boards, acquired because the mineral content of their rations required supplementing.

The ancient Egyptian priests preserved a rigid califfy.

Harnessing Canada Water-Power Resources

Report Shows 5,325,000 Horse-
Power Now In Operation

With world interest centred upon the efforts being put forth in almost every civilized country to secure additional supplies of low-priced power for the needs of industry, the annual review of hydro-electric progress in Canada by Hon. Charles Stewart, Minister of the Interior, is of timely significance, indicating as it does, that throughout the Dominion the greatest activity prevails in harnessing for industrial, commercial and domestic use the advantageously situated and ample water-power resources of the country.

During the year 1928 the energy of the waterwheels or turbines actually installed and brought into operation amounted to 550,000 horse-power, thus bringing the total for the whole Dominion to 5,325,000 horse-power. In addition to this large increase, there are many projects under active construction, some of them nearing completion and others just recently initiated, whose combined installations will result in adding more than 1,200,000 h.p. to the country's total. There are also many projects of magnitude in the formative stage, some of which will undoubtedly be undertaken in the near future.—Regina Daily Post.

Not His Responsibility

A Scotch widow who had lost her husband in a railroad accident succeeded in getting two of her fellow countrymen to agree to bring up her child in case she died when it was born.

It happened that the mother died giving birth to twins. One of the Scotchmen was away at the time, but he received the following telegram from his friend who had joined in the promise:

"Twins born today. Mother dead. My twin also."

A Silencer

Young Lady — I want a bow, please.

Smart Young Clerk—I'm at your service.

Young Lady (eying him closely)—Yes, but I want a white one—not a green one.

Kingship Is No Sinecure

Ruler's Life Is A Busy One Says
Famous Portrait Painter

It is disclosed that there is a portrait of King George painted just before his recent illness which has not yet been seen by the public.

Frank O. Salisbury, who painted it, depicts the King making the traditional gift of gold and silver to the poor during the installation ceremony of the Knights of the Honorable Order of the Bath. The scene, which has never before been painted, glows with color. It was sketched by the artist, who is well known for his representations of historical subjects, and later the various personages who figure in it came individually to sit for their portraits.

When King George arrived at Mr. Salisbury's studio the enormous canvas was complete except for his own picture. When the King inspected it he began to laugh.

"My sword," he said. "You have painted me in an admiral's uniform and have given me a Field Marshal's sword. You didn't think I would notice a little detail like that, did you?"

To remedy matters, the King sent to the studio his elaborate sword which he has as an Admiral of the fleet. On its beautiful blade are engraved the names of all the warships with which the King was associated while during his naval career.

Just how busy a man King George has been all his life might be gathered from Mr. Salisbury's reminiscences.

"So far as I have observed," he said today, "Kingship is no sinecure. I received an appointment for the first sitting for a war portrait of his Majesty for noon one day. I went at 11 o'clock, and during the next hour watched the King decorate soldiers, shake each of them by the hand and with gracious words, enigmatically make a number of nervous heroes happy. He had been, doing it since 10 o'clock that morning, and had arisen at 7 o'clock to accomplish his day's work."

"At noon he sat for his portrait, which is hard work even when one is fresh. As I was leaving, he said, 'I have not been fair to you, I am afraid, because I am sure I have shown signs of drowsiness a number of times.' At that period the King had not had more than two weeks' vacation in five years."

"The Prince of Wales is also an extraordinarily busy man. He was to sit for me at 5 o'clock one afternoon. He motored all morning to the south of England to perform some public function. In the afternoon, without any lunch, he motored to Alton, where he reviewed the troops. Precisely at 5 o'clock he arrived at my studio in London, weary but still with much to do. He had to deliver an important address before a distinguished gathering at dinner. He had his speech with him and asked me if I would mind if he ran over it during the sitting."

"While I painted, the Prince studied his speech, and at 5 o'clock he left to prepare himself for the evening."

Did Not Sound So Good

"I don't know whether to accept this testimonial or not," mused the hair-restorer man.

"What's the matter with it?" demanded the advertising manager.

"Well," explained the boss, "the man writes: 'I used to have these bald spots on the top of my head, but since using a bottle of your hair restorer, I have only one.'"

Production Of Cobalt

The world's output of cobalt metal and salts is now controlled by African and Canadian producers, who also, to a large extent, control the available raw materials.

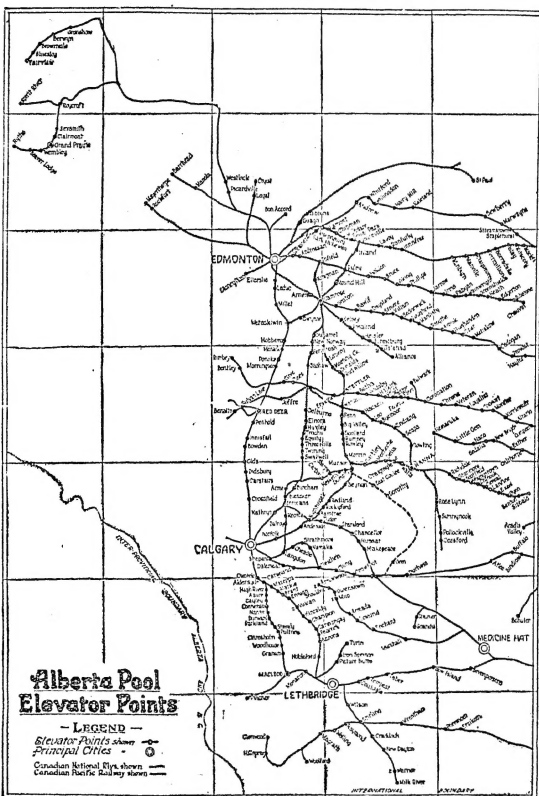

Porter: "What are you doing here?"

Guest: "Pardon me, I am a somnambulist."

Porter: "I don't care what your religion is, but you are not allowed to wander about the corridors in your nightgown."—Lustige Kölner Zeitung, Cologne.

ALBERTA WHEAT POOL ELEVATORS

The above map shows the progress of 2 cents a bushel on all wheat handled. In three years the elevator reserve has reached the total of \$3,653,494.87.

The Alberta Pool elevator system handled 27½ million bushels from the 1927 crop, or 35.57 per cent of the total pool handlings. This year the system has already handled over 35,000,000 bushels, and hopes to handle close to 60 per cent of all wheat delivered to the Alberta Pool.

The location of pool elevators is decided on the basis of deliveries of pool wheat. Elevators are built first where the larger pool deliveries are made. This year at least one hundred new elevators will be built.

Pool members who deliver their wheat to pool elevators participate in the excess earnings of these elevators on a patronage basis. Last year close to \$1,000,000 excess earnings were thus distributed after 8 per cent interest had been paid on capital and certain reserves set up.

CHAPTER XIII.—Continued.

Andy took the wounded bird from her hand. "Ow did it happen, Connie?" he asked tenderly.

Connie was as open and unaffected as the wild birds of the forest. She was as capable of hating as she was of loving. Her eyes were laughing eyes, and the soul that looked out from a merry soul, but she had a temper, and under sufficient provocation her blue eyes could take on a dangerous glow.

She now turned like an enraged lioness on the foreigner. "He killed it with a stick," she cried furiously. "You brute, you cowardly brute..." In her rage her voice became incoherent. With hands clenched and with breath coming in short gasps, she moved nearer to the object of her hatred. In her hysterical anger her voice rose almost to a scream.

"You cur, if I were a man I'd—Ow! lick you!"

The cry came to Donald's ears, and he was off up the trail like a deer.

"Go ahead, I'll follow," responded Gills.

Andy looked down on the mother goldfinch as it lay in his hand. He felt the throbbing of his heart grow fainter and fainter. One wing was broken and its white breast was stained with blood. The bird's head drooped lower, and a film settled over its bright eyes. The beautiful wings stretched rigidly, and it gasped convulsively, sending a tiny stain of crimson from its mouth that fell far on his palm.

Andy's face became colourless. His hand shook violently as he placed the dead bird tenderly on the ground. "Connie dear," he said, in a voice that trembled, "I ain't a whole man, but I've where you see 'art a man goin' into battle to give all his got."

He removed his coat and threw it over him. Through a rage-mist Andy saw the grinning foreigner throw up his arms in an absurdly unscientific posture of defence. Like a mad cat, Andy launched himself straight at his husky opponent. The grin was wiped from the big man's face by Andy's compact fist, as it smacked resolutely on the end of his thick nose with a snap like that of a whip, and with a skilful force that brought blood.

Andy's years of training boxers now stood him in good stead. He well knew that a small man would stand little chance in long range fighting, and he kept well inside the larger man's wild swings. With his blond head tucked against his adversary's body, his fists worked like pistons; he kept sending short jolts to the body that brought heavy grunts every time they landed.

Connie was delicious with excitement. "Hit him, Andy! Hit him! Good! Good!"

And then she groaned as the big man's hand found Andy's throat and flung him to the ground. Little Andy was up immediately, but stepped into a swinging fist that caught him over the eye and sent him sprawling. Undaunted, he came to his feet, waited warily for an opening, and again sprang under the big man's guard.

Andy's fist shot up in a ripping uppercut that was judged to be a nice, catching his opponent on the point of his chin with force enough to send him rocking on his heels, and before he could recover himself the same fist, accompanied by its mate, beat a tattoo on his solar plexus.

In desperation the bewildered man wound his arms about the little Australian and lifted him high in the air. Like a game bulldog Andy hung on. Though his feet were off the ground, he clung to the big man's body like a leech.

Again the big hands felt for Andy's throat, and he was flung six feet to strike with a thump. That shook every bone in his body. Connie cried out in fear as he narrowly avoided a brutal blow aimed at his head.

Andy's sense of British fair play had received a rude shock. "As Mehlhausen said," he panted, as he came to his feet, "when in Dohnukia do as the Dohnukies do."

"Take that, Spaghetti!" he shouted, as he kicked the foreigner viciously on the shin. While the latter leaned over in pain, Andy shot a well-directed uppercut to his face. The big man sat down, a dazed look in his eyes.

Breathless, Donald arrived on the scene, with Gills puffing in the rear. Breathing heavily, Andy's adversary came to his feet, picked up his hat, and with arms wound about his head beat a hasty retreat. Andy was after him like a hornet, sending stinging blows through his vulnerable guard. Donald and Gills stood with mouths agape to see Andy administering a sound thrashing to a man twice his size. Right to the edge of the woods he relentlessly pursued his fleeing enemy.

Andy's head was held at its usual cocky angle, and he assumed an swagger as he retraced his steps, but his short legs wobbled and he sank dizzily to a stupor.

"I brought 'is blinkin' meat-ouse down, Connie," he gasped.

"Oh, Andy, you're a darling!" she cried, throwing her arms impulsively around the little man's neck, and touching her lips to his cheek.

Andy's florid face took on a deeper magenta, and he blinked hard to hide certain signs of emotion. He afterwards admitted to Donald that he was no "sweet sixteen," and that it was the first time that he had ever been kissed in his "bloomin'" life.

Connie wet her handkerchief in the cold water of the creek and bathed his face with tender care.

She showed Donald and Gills the nest with the motherless birds, doomed to die a premature death by this act of wanton cruelty, and pointed to the tiny bird on the ground, for whose untimely and Andy had taken a well deserved and summary vengeance. Connie choked as the golden male bird flew to a stalk of lovely male bird its dead mate and sent out its throaty wail.

"Dear, dear, dearie," sang the goldfinch in a plaintive, questioning note.

Andy presented a pitiful figure with an eye closed, his lips swollen, his face bruised, but the indomitable spirit of him shone from his one bright orb.

"You darned little buzz-saw!" said Gills tenderly.

Donald slapped his little friend on the back, his eyes shining with admiration.

COUGHS

are Nature's signals warning that resistance is broken and the body undermoulded.

Scott's Emulsion

is a blessing to all who need strength. It helps keep the body vigorous and healthful. Try it!

Scott & Borne, Toronto, Ont. 25-59

CHAPTER XIII.

Renwick announced that Robert Rennie's daughter and a party of girl friends were to visit Summit Lake the following week, and carpenters were set to work erecting cottages for their accommodation.

A few days before her arrival Donald was both surprised and pleased to receive a cordial letter from her in which she said that she was looking forward with pleasure to the coming holiday, and that she would deeply appreciate anything he might do for the entertainment of her friends.

As always, her father spared no expense in providing for the comfort and pleasure of his daughter. That week a car containing a motorboat, canoes and six saddle-horses was run in on a side-track at the mill.

Connie learned of the coming event through Donald as she was watching with keen interest the unloading of the spirited animals.

"You will enjoy yourself next week, Connie," he said gaily. "Miss Rennie is coming with friends. We'll have rides, picnics and dancing."

A few minutes later Connie joined Andy, who sat on the steps of the kitchen door enjoying a breath of fresh air.

"Is Miss Rennie rich, Andy?"

"An 'ole barrel' o' dough."

"Is—is she beautiful?"

"I've 'eard so, Connie."

A short pause ensued while she searched the pockets of her overalls and produced several neatly folded papers. She extracted one, pressed it smooth, then passed it to Andy.

"Does Miss Rennie dress like that?"

It was a photograph of an actress dressed for the street, taken from one of the magazines that Donald had given her.

"I think so, Connie."

"Oh! She must be wonderful, then!" said Connie earnestly.

She moved closer to Andy, unfolded another page, and spread it out on her knee.

Andy bent his blond head close to the one of gold. A startled look crossed his features and his brows bobbed up and down. It was a full-page advertisement of ladies' lingerie.

The highly coloured illustration of a lady, partially dressed, achieved its object of arresting the eye, while the remainder of the space was occupied by articles of apparel similar to those adorning the lady's graceful form.

Andy coughed. "Er—yes, Connie."

Connie raised her eyebrows incredulously.

"All at one time?"

"Sure—sure," mumbled Andy.

Connie stared. "Why, there must be nearly a dozen pieces. How is this fastened?" she questioned as she pointed with a slender brown finger to one of the engravings.

Andy took a quick glance. "Buttons."

"And this?"

"Buttons," replied Andy, gripping the bowl of his pipe and sending out clouds of smoke.

"Any like?"

"Strike me blind, what a 'ell of an 'ole," thought Andy.

"Buttons," he responded desperately without looking at the paper.

(To Be Continued.)

Canada's Historic Sites
The Historic Sites and Monument Board of Canada is composed of historical authorities, and one of its duties is to recommend to the Department of the Interior, historic sites worthy of being marked, restored, or preserved. The board meets annually to consider the various sites brought to their notice and forwards its opinion to the Department of the Interior which makes the decision and carries out the work through the National Parks of Canada Branch.

"Your girl is a blonde, eh? Suicide or natural?"

"What do you mean by suicide blonde?"

"One who dyes by her own hand."

Suitor—And, darling, let's be married soon.

Finis Actress—Sure. Let's make it next week. I've never been married in January before.

Minard's Liniment for Coughs and Colds.

W. N. U. 1709

Quality Of Canadian

Goods Has Improved

Research And Skilled Labor Have Been Big Factors

The quality of Canadian products is steadily improving, with greater knowledge of research, scientific methods, processes, application of skilled labor and the needs of buyers. In the face of mass production competition, Canadian producers are making to hold their places by giving special service, better quality or distinctive features to their products. That they are succeeding is proved by the fact that Canadian manufactures are exported to over a hundred countries, while supplying the greatest part of domestic needs. A still greater share of the home market would result in more production, more employment and more exporting, and it is therefore important that home industry should be encouraged by stabilization and other necessary measures as much as possible.

Recipes For This Week

(By Betty Barclay)

RICE AND SALMON SALAD

Take equal parts of salmon and cold boiled rice; stir with a fork until the fish and rice are thoroughly mixed. Pour into a salad dish and cover the whole with mayonnaise or boiled dressing.

Canned tuna fish, left-over chicken, meats, ham, or vegetables can be used in the same manner—always use equal quantity of rice. The addition of celery and hard-boiled eggs make a more elaborate dish.

SANDWICH FILLING

One pound of mixed nuts (be careful to keep small particles of shell from clinging to the meats). One cup seedless raisins. Grind together in a food grinder, add a little salt and the juice of one small orange. Work together very thoroughly, place in a glass container and keep in a cool place. Can be used between thin, well buttered slices of whole wheat, white or bran bread. Ideal for school lunches, workmen's lunches or picnics.

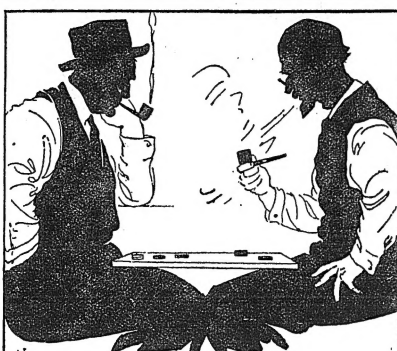

Already Advised

An "accident" case, in which the patient was suffering from a wound in the head, was taken to hospital. After taking the usual particulars as to age and next of kin, the official said: "Now, don't worry, I shall take immediate steps to ensure your wife being advised of your detention here, and so save her from anxiety." To which the patient resignedly replied: "She did it, Miss!"

Sixteen hundred different noises disturb Milwaukee, according to police survey.

Hewitt—"Can you get your wife to try the budget system?"

Jewett—"No; she won't budge."

Congress Of Nurses

Delegates Coming To Montreal Convention From Many Lands

For the international Congress of Nurses, to be held in Montreal, in July, acceptances have been received from the following countries to date: Great Britain, United States, Australia, New Zealand, Hawaii, India, South Africa, Irish Free State, France, Belgium, Germany, Switzerland, Spain, Italy, Bulgaria, Austria, Poland, Greece, Turkey, Yugoslavia, Czechoslovakia, Latvia, Estonia, Sweden, Norway, Holland, Denmark, Iceland, Cuba, Java, Philippine Islands, Brazil, Ecuador, Argentina, Chile, China, Japan, Korea, and Syria.

Trappers Use Airplanes

Bring Furs From North Country To Winnipeg By Modern Methods

For the first time in history, an airplane has been carrying furs from the wilds of Northern Manitoba to the Winnipeg market. Hollick Kenyon, aviator, left Cranberry Portage for Brocket settlement the other day, taking Del Symonds, veteran trader, whose aim was to beat all competitors, who take a month to travel by dog team.

She—"Alfred, I know I have my faults."

He—"Yes, dear."

She (rigidly)—"Then perhaps you'll tell me what they are."

Little Helps For This Week

"As we have therefore opportunity, let us do good unto all men,"—Galatians vi. 10.

The means that Heaven yields must be embraced and not neglected.—Shakespeare.

Miss not the occasion; by the forelock take That subtle power, the never-halting time, Lest a mere moment's putting off should make Mischaunce almost as heavy as a crime.

—William Wordsworth.

It is decreed in the providence of God that although the opportunities for doing good, which are in the power of every man, are beyond count or knowledge, yet the opportunity once neglected, no man by any self-sacrifice can atone for those who have fallen or suffered by his negligence.—Julian Horatia Ewing.

Essentially Done

George (nervously): "I'd like best in all the world, Rose, to marry you, but I don't know how to propose."

Rose (promptly and practically): "That's all right, George, you've finished with me. Now go to father."

Actor—"I say, you know I'm getting awfully popular. I see some tobacco people have named a new cigar after me."

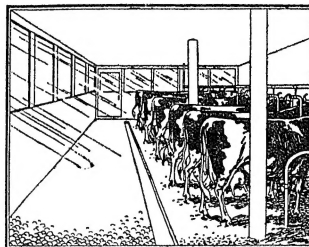

Manager—"Oh! Well, I hope it'll draw better than you do!"

WINDOLITE

The Improved
Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light lut strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length, but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

When Pain
Comes

What many people call indigestion is really excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

nutrient alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Annual Meeting of Chinook Consolidated School District

The annual meeting of the Chinook Consolidated School District No. 16 was held in the school on Saturday afternoon, the 12th inst. There was a fair attendance and those present took a great interest in the discussions. J. L. Carter, chairman of the School Board, called the meeting to order at 2 p.m.

The minutes of the last annual meeting having been read by the Secretary, Lorne Proudfoot, their adoption was moved by Hille, seconded by McLean.

The usual Principal's report was given by Mr. Korek. The main items in his report were: Enrollment 142, grades taught 1 to XI inclusive, average attendance for the term being 117 per day. A report on the various districts in the consolidation was also given.

The Principal then gave a very interesting paper on "The High School and What the People Expect From It."

Mr. Korek closed his report by stating that co-operation between parents and teachers was very necessary in order to produce satisfactory results in the classrooms.

The Secretary then gave his report.

The nominations for trustees resulted in H. O. Hille being nominated on the motion of Westphal—Hille for Carpathia district, and Neil McLean for Crocus on the motion of Johnstone—McLean. At the close of the period allowed for nominations the chairman declared Mr. Hille elected for Carpathia S.D. and Mr. McLean for Crocus S.D.

The meeting was voted closed on the motion of C. Neff and Mrs. Meade.

The first meeting of the newly elected Board of Trustees was

held immediately following the annual meeting.

Following are the resolutions as passed:

Hille: That Jas. L. Carter be chairman of the Board.

Carter: That Lorne Proudfoot be Secretary-Treasurer at a salary of \$300.00.

McLean: That L. S. Dawson be Auditor.

McDonald: That L. S. Dawson be Assessor, salary \$25.00

McLean: That we call for tenders for the position of janitor.

The minutes of the Board meeting of Dec. 18th were then read.

Carter: That these minutes be adopted as read.

Hille: That the following accounts be paid:

Workmen's Com. Bd....	\$ 4.96
Service Garage, light ...	12.93
E. E. Jacques	6.30
Banner Hardware	10.15
R. D. Vanhook	41.80
Acadia Produce	13.55
L. S. Dawson, 1928 audit ..	10.60
M. S. Chapman	18.77

Hille: That debentures becoming payable on Jan. 15th, and amounting to \$1,222.50 be paid.

McLean: That Sam MacNeill be given 50c per day for conveyance of his children to Cereal from March 19th to Oct 20th last year, 101 days, \$50.50.

Hille: That Messrs. McDonald and McLean look into the bill for putting up the moving picture booth and report at next meeting.

McDonald: That Levi Vennard be allowed to work out his father's taxes by driving van on Route 2 at \$5 on a day, after which time he shall continue driving this route at \$3.00 a day cash.

Carter: That to deal with any matter of an emergent nature in connection with van-driving, the following committees be appointed: Routes 1 and 2, Geo. McDonald; Routes 3 and 4, Aug. Roseman; 5 and 6, Neil McLean; Route 7, H. O. Hille.

That the following be the estimates for the year:

EXPENDITURE—	
Teachers' Salaries	\$ 5,400.00
Officials' Salaries	335.00
Debentures, 1929 only ..	1,222.50
Van Driving	6,500.00
Grounds and Building ..	400.00
Supplies and equipm't ..	500.00
Fuel	425.00
Caretaking	1,020.00
Other Expenditure	1,000.00
Total	\$16,802.50

RECEIPTS—	
Estimated Gov. Grant ..	\$ 3,300.00
Rent of School	400.00
Tuition Fees	300.00
Taxes	14,000.00
Total	\$18,000.00

Hille: That the rate of taxation this year be sufficient to place on the roll at least \$15,706.00, the same amount as was levied in 1928.

Hille: That the members of the Board for 1928 be each paid \$3 in lieu of little expenses incidental to attending meetings of the Board.

Hille: That W. A. Steckle be allowed off for three home games of hockey with the Cereal team, provided he can get there without leaving his work before 2.30 p.m.

McDonald: That next meeting be held in the Chinook Hotel on Monday, Jan. 28th, at 3 p.m.

LOCAL ITEMS

Mrs. Butts entertained a number of ladies to afternoon tea on Friday.

R. D. Vanhook was a Calgary business visitor for a few days this week.

Mrs. H. Johnson is visiting at the home of her brother, A. V. Brodine this week.

F. Bassett returned from Calgary on Monday and reports Mrs. Bassett is improving.

A number of young people attended the wedding dance at Mr. John Polkens' and report a very enjoyable time.

Mr. and Mrs. J. Whitley of Heathdale returned from Calgary on Tuesday, where Mrs. Whitley has been taking medical treatment.

We are glad to report that Mrs. A. V. Brodine, who has been ill with rheumatic fever is improving rapidly.

Miss Johnson of the bank staff at Cereal has been transferred to the Union Bank at High River.

Don't forget the Agricultural Society's "Bobby Burns" picture show and dance to be held Friday, Jan. 25.

Mr. Isbister received the sad news this week that Mrs. Girvin of Peterborough, Ontario, passed away. Mrs. Girvin is Mrs. Isbister's mother.

Alex. R. McTavish, R.O., sight specialist of Calgary and Drumheller, will be at the Acadia Hotel, Tuesday, Jan. 29th. Eyes scientifically examined. Glasses fitted. Graduate of the College of Optometry of Canada.

The Ladies' Card Club met at the home of Mrs. Chapman on Tuesday evening. The prize, a beautiful Yardley's set, went to Mrs. Rennie. Mrs. Todd will entertain the ladies next week.

Norman G. Cary, of Armstrong, B.C., has accepted the position in the Advance office vacated by R. Kersey. Mr. Cary, who for many years had charge of the "Armstrong Advertiser," commences his highly recommended

A survey of current publications places the Family Herald and Weekly Star of Montreal in the lead for variety and quality of reading. Always recognized as a steady guide and councillor to the farmer the survey pronounces it almost as equally popular in the urban homes.

This week's play at the ice is as follows: Monday night, Rennie Competition, Dawson won from Todd; Deman won from Milligan, I. S. Smith's rink (skipper, C. E. Neff), won from Jacques, Jones won from Harley. In the Jacques draw Tuesday night, Hurley won from Jones and Dawson from Milligan.
